Your calculated TOTAL: £ \_\_\_\_\_

Please add any notes here:

### MAILING INSTRUCTIONS

If ordering frame and lenses complete we need to know the distance between your eye pupils. The way to achieve this is to stand approximately 30cm in front of a mirror wearing your regular glasses, and with a marker pen accurately dot the pupil of the eye you are looking into, then do the same with the other eye.

Measure the distance between the two dots in millimetres and send this measurement to us with your prescription. We will do your lens centres from this.

Please send this form, your cheque and (if applicable) your frame to:

Prism Optical Services UK  
PO Box 940  
Sudbury, Suffolk  
CO10 0XR
